Electrodeionization (EDI, CEDI) Systems

Electrodeionization or Continuous Electrodeionization is one of Applied Water Solutions core competencies. We've worked with EDI since the first commercial offering in the 1980's, and since then have worked with all EDI suppliers on hundreds of EDI installations worldwide. We can explain the technology and all the different product offerings; we 'bring clarity to the turbid waters of technology SM'. Our standard product line can be customized to conform to any material of construction, system control preference, sanitization preference, capacity requirement, and application. Ideal for pharmaceutical/ biotechnology, semiconductor, power and general industry.
